CASE STUDY

Sitwell Park Golf Club - Rotherham

The Background

Sitwell Park Golf Club in Rotherham were interested in a Solar PV system to help reduce their energy spend and improve their green credentials. They contacted Perfect Sense Energy to design, supply and install a suitable system.

The Solution

Perfect Sense Energy designed a 10.8kW system to fit the golf club's bespoke requirements. This system is set to generate 9536 kWh of free electricity to use per annum, with a combined overall first year income and savings of £1,641.

The system is expected to save 120 tonnes of CO2 over a 25 year period and has a huge potential overall net income/savings of **£62,294**.

The Results & Feedback

This system helps protect Sitwell Park Golf Club from rising energy prices and reduces their reliance on grid power. The power they generate is clean and free and they have a 20-year income stream thanks to feed-in and export tariffs. Remote monitoring allows both Sitwell Park Golf Club and Perfect Sense Energy to monitor generation, energy and income for the site.
